ICE London annually provides an exciting opportunity to connect with the industry and identify emerging trends early in the year. In addition to cultivating new ideas on-site, our team looks forward to discussing these and other topics with our valued network of colleagues and clients:

- Analytics Strategies for Gaming Operators
- Stateside Sports Betting Opportunities
- Space Use and Amenities
- Greenfield Development

Look for more from us soon on these and other topics as we continue to prepare for London, including a forthcoming Market Brief on Portugal. In the meantime, check out our recent compilation of TIG commentary in *Global Gaming Business* magazine, covering everything from analytics for small operators to our latest customer research on amenities use.

Set Up a Meeting with Our Team
