

After the break that followed a rather busy first half of the year which started with ICE in London and continued with AMEX, SAGSE Panama, Juegos Miami and Peru Gaming Show, DLV has approached yet another trade show stage of 2017 – G2E Las Vegas.

At this event we will continue showcasing our this year's releases. Hardware products will be represented by the compact and ergonomic Diamond Z machine featuring 24" LCD screens, iVizion bill acceptor and other peripherals, as well as management systems support. This and another company's cabinet – Diamond Excel – will be exhibited with a series of new multigames. First of all, we hope to consolidate the success of this year's "debutant" Silk Flowers jackpot with 25 games and four mystery progressive levels which is already successfully working in several countries, while being certified for a number of other European, Asian and Latin American markets. Another product to be showcased - 12-games Jewel Jackpot Lux – has been intended as a support to our customers, so that they could renew their gaming offer with minimum investment. Finally, there will also be the breathtaking Diamond Games Ultra 4 with 25 games which was first released during last year's G2E Las Vegas and over this time has made substantial gains on international markets.

We look forward to seeing G2E Las Vegas guests at booth Nr.3219!
