Gary Platt Manufacturing Brings Unsurpassed Seating Comfort to Casino and Hospitality at G2E 2022

Gary Platt in booths 2618, 2820

When players are comfortable, they enjoy themselves longer, and no chair is more comfortable than those from Gary Platt Manufacturing. Now the company is bringing its unsurpassed casino and hospitality chairs to G2E 2022.

A recent live, in-casino test conducted over several weeks compared slot performance with Gary Platt chairs and competitive products. Test results showed a 3 percent increase in time-on-device and an 11 percent increase in coin-in. Click to read more: [Study Results](#)

Comfort and performance are two reasons why Gary Platt recently celebrated a milestone achievement for the gaming industry when the company produced its 1,000,000th casino chair.

At G2E, Gary Platt's booth will be filled with a blend of new and classic chair models, including the globally popular and patented Monaco and Tesla casino models and an all-new version of its advanced and supremely functional Sportsbook Club model.

The new Sportsbook Club has innovative flat tablet arms, making it easier and more comfortable than ever for fans to mark racing forms, keep up on the action on their laptop or phone, or enjoy food and beverage.

The chair has options for tablets on each arm or a choice of right or left. A removable stainless steel cup holder snugly fits inside the tablet or directly into the arm. There are also a multitude of charging options including two USB ports, a power outlet, or the new wireless charging feature that will keep players charged and ready for phone-betting action.

The seat is a generous 21 inches wide, and quick-change seat and back means repairs are fast and easy and will not cause disruption to the gaming action. Optional sports-style stitching adds an athletic design flair.

Also on display will be a wealth of seating solutions from Gary Platt's Sierra Nevada Hospitality division. Hospitality chairs are notoriously uncomfortable. Gary Platt changed the industry by creating the Sierra Nevada Hospitality line, filled with hundreds of models for every hospitality area: bar, banquet, convention, dining, office, wedding, and more.

Beyond function, Sierra Nevada Hospitality chairs are highly customizable, from seat to back shape, leg design and color, fabrication, and materials. Like Gary Platt's casino seating, every chair in the Sierra Nevada Hospitality collection is custom designed and hand-crafted to each customer's unique and exact specifications.

The hospitality line is pillow-soft thanks to its exclusive Platt-foam. The unsurpassed comfort comes from Gary Platt's exclusive cold-cured foam for a sit that is luxuriously soft. The foam process ensures consistency in the shape, density, and quality, and it is highly elastic, so it retains its firmness even after years of use. Additionally, there is a 10-year guarantee this form will not bottom

out.
