

Regulators, Operators and Suppliers Make Success Their Only Option at G2E 2017 with Gaming Laboratories International (GLI®)

LAS VEGAS (September 20, 2017) – Regulators, operators and suppliers in 475 jurisdictions rely on [Gaming Laboratories International \(GLI®\)](#) to help them succeed with an unsurpassed portfolio of services. GLI will be in G2E booth #4430 showcasing products and services to further help guarantee success for their clients.

Success for regulators and operators begins by ensuring valuable assets are protected in real time. On the casino floor, products by [Kobetron](#), including IRIS Enterprise™, IRIS Online™, Kobetron Handheld Equipment™, and Verify+ by Kobetron™, streamline processes while also tracking and certifying every asset on the casino floor, all in real time.

Behind the scenes, professional services from [Bulletproof](#) monitor, detect and instantly react to cyber attacks. Bulletproof President Steve Burns said, “In today’s digital marketplace, data and reputation are more valuable than money, and once a breach occurs, it is extraordinarily difficult to rebuild trust with consumers and business partners. That is why our Security Operations Center, or SOC, is always on, always scanning and always protecting, safeguarding against the constant attacks that are a part of today’s cyber landscape.”

GLI also has a broad portfolio of supplier services, from testing and certification to remote systems testing and easy transference of certification letters, each carefully designed to thoroughly test while also streamlining processes, speeding time to market and reducing costs and testing times. GLI Vice President of Global Services Ian Hughes said, “As you look around the G2E tradeshow floor, this is every supplier’s big moment. That is why we work so hard to help suppliers make sure their bright ideas go off with a bang.” GLI’s portfolio of testing services has been leading the industry since the company was founded in 1989. Today, GLI has the ability, capacity and expertise to successfully test any land-based, online or lottery device or gaming system. The company’s experts will also discuss their consulting services, including anti-money laundering, field inspections, network risk assessments, responsible gaming, rule-writing, and extensive training through the company’s [GLI University®](#) program.

GLI professionals will lend their insights to several panels at G2E including:

- GLI Vice President of Government Relations and General Counsel **Kevin P. Mullally** – Monday, Oct. 2, from 10 a.m. to 11 a.m. (IAGA Best Practices for Best Results at G2E 2017) – *What Does the Constantly Shifting Gaming Landscape Mean for the Regulated Gaming Industry?*
