

Evoplay Entertainment set to unveil its second 3D / VR title at ICE 2019

Sprinkle slot to follow showcasing of industry's first 3D/VR title at ICE 2018

Malta, 30th January 2019: [Evoplay Entertainment](#), the innovative game development studio, is to showcase its second fully 3D / VR in-browser enabled slot title at ICE 2019.

The game, *Sprinkle*, takes players on a VR enhanced, 3D-dive into a psychedelic world of luminescent mushrooms, enveloped by an accompanying soundtrack of dreamy music serving to enhance the unique gaming experience even more.

As well as boasting generous features that include wild substitutions and a range of free spins, a combination of neon graphics and smooth animation showcases *Sprinkle* as a thrilling, unforgettable slot powered by cutting-edge technology.

Coming hot on the heels of the developer's highly acclaimed *Necromancer* title, which was nominated for a host of awards in 2018, including Best Gaming Innovation at December's SBC Awards, Evoplay Entertainment plans to cement its innovative reputation further by continuing to unveil some of the industry's most advanced slots at headline events.

As well as *Sprinkle*, Evoplay Entertainment plans on showcasing its latest table games, including *American Roulette* and a teaser for its upcoming breakthrough RPG slot to be released soon after ICE 2019 — all of which can be found at stand N7-350, with Chief Business Officer Kate Romanenko and her team on hand to demonstrate their unique features.

Evoplay Entertainment CEO, Alexander Levchenko said: *"Our mission with every game is to revolutionise the iGaming user experience through innovative gameplay."*

"ICE is the hottest event on the industry's calendar, and we intend on picking up where we left off in 2018, where the unveiling of Necromancer proved to be one of the show's biggest hits. We look forward to showcasing our leading industry content to our fellow gaming aficionados at stand N7-350!"

Evoplay Entertainment's latest titles join a 60-strong portfolio of slots, table, and instant games produced at the company's development studios in Ukraine. Licenced in Curacao, with additional licences in Malta and the UK on their way, it has established a network of partnerships throughout Asia, the CIS, and Europe.
