NEWS RELEASE

**JCM Global Brings Award-winning Transaction Solutions to ICE 2018
that Benefit the Entire Operation**

DÜSSELDORF, Germany (18 January 2018) – JCM Global's innovative, secure solutions lead the industry, are operators' first line of defense against counterfeiters, and help to manage cash in the back office. Now on ICE stand #N3-220, JCM will present its broad portfolio of award-winning solutions, arranged in four distinct areas on the stand: casino, arcade, sports betting, and back office.

"We are excited for ICE 2018 and for the excellent opportunity the show provides us to interact with our customers," said JCM EMEA General Manager Payam Zadeh. "We have divided our stand into four unique sections, and that modular configuration will help make it easy for our customers to find the perfect solution for their specific needs."

In the casino section, attendees will find JCM's iVIZION® bill validator. Field-proven worldwide with more than 250,000 units shipped to date, its CIS technology scans the entire note or ticket, reading more than 9.5 million data points on every note, more than twice that of the nearest competitor.

The UBA® bill validator accepts currencies up to 85mm wide and protects operators with a powerful combination of superior magnetic and optical sensing technology coupled with superior anti-pullback technology and an automatic retry feature.

JCM's TBV™ accepts single note and bulk note transactions, accepts multiple denominations and currencies simultaneously, and its bulk note feeder accepts up to 50 notes for quick processing of large stacks.

Printing solutions begin with the GEN5™, with its faster CPU and faster print speed, flexibility to print TITO and promotional tickets, and various wager tickets and templated promo coupons, and JCM's CouponXpress™ desktop TITO/coupon printer brings the functions and flexibility from the game to the cashier's cage, hotel front desk, unattended kiosks and other transaction points.

The ICB® 3.0 drop management system is field-proven to save operators 100s of 1000s of dollars annually and can provide real-time health monitoring data and predictive drop and maintenance scheduling to dramatically increase operational efficiency.

Also showing in the Casino Section is JCM's FUZION® technology. When combined with iVIZION and GEN5, FUZION unleashes the possibility for each slot machine could become a multi-line profit center with the current potential to:
- Vend and redeem lottery tickets
- Vend and redeem race & sports betting
- Facilitate Daily Fantasy Sports (DFS) wagering, the casino's own or a 3rd party's
- Conduct cross-enterprise promotional couponing for carded and uncarded players
- Enable real-time currency exchange with exchange rates
- Streamline tax forms processes

In the Sports Betting Area are the Vega™, Vega-RC, Vega-RC Twin™ and DBV-500 bill acceptors. The Vega line's combination of bill acceptor and the optional recycling unit makes the it an attractive choice, and the DBV-500's universal design supports most major currencies without any hardware modification. Additionally, the Nippon Printer's super compact design makes it the perfect solution for kiosks.

In the Arcade section, attendees will find the EBA-40 acceptor and the Fujitsu F53/F56 acceptors/dispenser. The EBA can accept notes up to 85 mm wide, and has integrated mechanical anti-stringing technology, while the Fujitsu F53/F56 can dispense up to 6 denominations at a speed of two banknotes per second.

JCM's Ticket2Go retrofit ticketing solution for gaming and AWP devices offers a safe, secure and easy to use solution that has been deployed with a variety of AGC, Bingo and Pub Retailers that is multi-lingual and multi-currency.

The Back Office section features the high-speed deposit RDM 100, short-edge banknote validation module, which can dramatically increase efficiency and security. Its full-width image scanning allows for superior banknote validation, dye stain note detection and serial number reading. It processes notes at an incredible 6 notes per second, and its 250-note capacity reduces load frequency. Plus, it can be easily integrated to the top or inside of an intelligent deposit safe.
