

Aruze Gaming Receives Gold Medal for Muso Triple-27 as the Best Slot Product at G2E 2018

Aruze Gaming receives gold medal for Muso Triple-27 as the Best Slot Product at the Global Gaming Expo 2018

Aruze Gaming America, Inc. (“Aruze”) is excited to announce that they have been awarded the gold medal for their Muso Triple-27 as the Best Slot Product in the 2018 Global Gaming Business Gaming & Technology Awards (“G&T”).

“Our customers already know the Muso Triple-27 is a great product, and we are pleased to receive this prestigious award recognizing that,” says Justin Arcemont, Managing Director of Global Sales. “Our first-in-the-industry wireless charging is easy to point to for innovation, but the LED backlighting makes just as much – maybe more!—of an impact on the floor.”

Muso Triple-27 is the industry’s first slot machine that features a wireless charging port for mobile devices. Muso Triple-27 creates a stunning light display with its LED backlighting that gives a 360-degree presence on the casino floor. LED lighting continues behind the monitors, in edge lighting along the monitors themselves, and even in the player’s wrist rest engulfing players in the game atmosphere. Additionally, the Muso Triple-27 provides stunning graphics brilliantly displayed on large 27-inch monitors.

The G&T Awards are the casino industry’s most prestigious awards, recognizing excellence in innovation. The panel of judges consisted of casino operators, gaming analysts, and consulting professionals. The other winners of the 17th annual GGB G&T Awards can be found by visiting <https://ggbmagazine.com/article/17th-annual-ggb-gaming-technology-awards-winners>.

“The GGB Gaming & Technology Awards are the pinnacle achievement in the gaming industry. The judges for the awards are the experts in their fields and to be chosen as a winner is a true honor and recognizes innovation and efficiency,” says Roger Gros, Publisher of Global Gaming Business Magazine. “Aruze has proven once again to be a leader in developing products that are truly transformative in the gaming industry.”
