Subject: ICE 2018 Preview
Publishing: For immediate release

EGT WITH MORE DEBUTS AND MUCH BIGGER BOOTH AT ICE 2018

EGT and its daughter companies EGT Multiplayer Solutions and EGT Interactive are ready to present an ICE exposition complete and perfect from every angle. At their booth S4-330 of over 1200 sq. m slot cabinets, jackpots, multigame mixes, various multiplayer solutions, multitude of online games and a top-notch casino management system will unite their best features to guarantee only an excellent service for the players.

Four completely new cabinets, all powered by the highly efficient Exciter III platform, will uncover the next EGT slot generation during the event. The models EGT-A-27/27 Up and EGT-B-27/27 St achieve exceptional visual clarity with their two high-resolution 27-inch widescreen frameless monitors, having as an option the same size topper for even more vibrant look. Their large and convenient keyboard, crystal clear stereo sound and exquisite design, combining high comfort for the players with modern aesthetics are also some of the advantages of the other two debuting cabinets – the EGT-A-27/32 Up and EGT-B-27/32 St. They lead the players through a vast gaming world with their 27-inch touch screen main monitor and attractive 32-inch landscape oriented top box with optional multimedia topper of the same size.

The visually engaging and technically advanced Dragon's Turn is the next latest release of EGT especially for the ICE 2018 audience. The Asian-themed four level progressive jackpot includes random jackpot and bonus wheels and is privileged with a dragon charm that brings tons of treasures. EGT is also set to highlight two recently developed multigame mixes. The Purple Collection is of 48 titles, 20 of which are completely new, and the Gold Collection HD presents superior high-definition experience, revealing 18 fresh as look and feel games.

The Spider casino management system of EGT will demonstrate its: newly created backup service, done on daily basis; developed super server which centralizes information from the operator's local servers; vault management tool, administrating casino's funds; extended jackpot configurations for better experience to the clients and integrated report control module, allowing custom reports configuration, including formulas and other modifiable parameters.

EGT Multiplayer Solutions has also prepared a myriad novelties. The STORK and S-line HD multiplayer terminals, different roulette models, including the twelve-seat T-Line roulette touch table with an automated wheel, and a rich variety of multiplayer games – Lucky Circle Wheel, electronic Blackjack, Bacarrat, Casino War, are just a small part of all. The jackpots Diamond Number and Jackpot Cards will also add more entertainment and options for winning. Recently the company included in its portfolio the well-known slot cabinets of EGT – Premier P-24/24 Up, P-27/27 St Slim and P-27/32H St, integrating its M-core platform to secure the Rigel and King HD multigames. A clear advantage of all mentioned products is that they can be easily connected into a complete solution and turn every gaming hall and casino into a multi-entertainment playground.

After a highly successful year EGT Interactive is now supplying over 100 operators around the world and has in its portfolio over 150 games for desktop and mobile devices. Each month the company develops at least 2 new gaming titles, most of them established on the notable land-based EGT portfolio. For the ICE show EGT Interactive will present some of its best games, like 40 Super Hot, Burning Hot, Flaming Hot, Blue Hearts, Amazons' Battle, European Roulette, Thumbelina's Dream, Almighty Ramses and many more, together with its newest developments, aligned with the corporate policy for high quality, attractive RTP and impeccable back-up service.

2017 has been another year in a row of higher sales results, market expansion and speeding up product development for EGT. A clear evidence for that at the ICE 2018 will be the twice bigger booth of the company, the higher number of exhibits and debuts and the more sparkling show than ever.
