TCSJOHNHUXLEY debuts Chipper Champ Pro at ICE 2018

TCSJOHNHUXLEY the premier manufacturer and supplier of live table gaming products and services, debuted the next generation of its world beating chipping machine – the Chipper Champ Pro.

This latest model has been developed to incorporate all the key attributes of the Chipper Champ 2, but packs a punch with even greater security and operational features that bring unbeatable benefits to the casino.

Tristan Sjöberg, Executive Chairman comments, *“The launch of a new chipper is always momentous for us as it’s at the core of our company’s DNA. The new Chipper Champ Pro does not disappoint. Once again, we have listened to our customers to develop a chipper that has enhanced security features as well as delivering key information at the touch of a button, providing real-time data and operational indicators, right at the source. We are very proud of the Chipper Champ Pro and know our customers will be delighted with it too!”*

The Chipper Champ Pro incorporates all new stand out features including built-in camera to identify suspected jams or rogue items in the hopper and a unique fold-away 10” digital screen that can display chip column counts. Wheel Bias reporting and Inclinator levelling information are available as an optional feature, requiring limited additional hardware connecting to the wheel. These powerful wheel insights are delivered direct to the digital display screen, removing the need to connect a PC to download data from the Roulette Wheel. Now operators can quickly and easily identify any potential issues discreetly from the gaming floor.

The improvements to the new Chipper Champ Pro are not just concentrated under the hood. The streamlined profile of the cabinet is retained but now incorporates LED lights to highlight contours and has the addition of speakers built in each side to allow the dealer to hear various prompts. The speaker facing the players and gaming floor is switched off, so as not to be intrusive.

The new Chipper Champ Pro looks set to once again raise the bar high as the gold standard of chipping machines, delivering improved productivity, security and reliability. The pre-production Chipper Champ Pro was unveiled at ICE with full production models available later this year.
