

## Win Systems will attend the next ICE edition

Miami, February 2, 2023 - [Win Systems](#), a leading provider of technology for the gaming and entertainment industry, will be attending the ICE trade-show on February 7th, 8th and 9th. The **Win Systems** team will welcome all visitors to its new location in the North Hall, booth N5-350.

In this edition of ICE, **Win Systems** will be sponsoring a seating area with meeting rooms to gather customers, colleagues, and visitors. **Win Systems** managers already have their agenda almost full with customers and operators interested in learning about its innovative casino solutions, including its renowned **WIGOS** casino management system (with powerful new products launched in 2022 such as **Winup Wallet**, the new generation of **InTouch** displays and the new **Lucy & Pierre** themed jackpot), and its Gaming division (with successful new products launched in 2022 such as the **Lumina 25** electronic roulette and several new slot games). **Win Systems** is willing to show its latest gaming solutions, which stand out for providing a fully adapted response to the needs of the different markets where it operates.

**Eric Benchimol, CEO of Win Systems**, explained: *"We are very pleased to participate one more year in the ICE Show to inform customers and visitors about our powerful and innovative developments, which enable them to optimize the management of their casinos and improve their players' experience. Every year we are more convinced that these events are the perfect opportunity to meet the different operators and usually open the door to new and interesting projects, in line with our growth strategy as a global casino supplier."*

*Win Systems will be at ICE'23 in the North Hall, booth N5-350. To arrange a meeting, please email [marketing@wingroup.com](mailto:marketing@wingroup.com) or call +34 935 308 049.*

### Note to editors

#### About Win Systems

WIN SYSTEMS is a global provider of technology for the gaming and entertainment industry. The company specializes in casino and lottery systems and services, server-based gaming machines and video lottery terminals (VLTs).

WIN offers a complete range of technological services, including design, programming, installation, operation, and maintenance of its systems.

Our systems are recognized throughout the world for their stability and reliability, allowing a high level of real-time control of both lottery and casino operations.

In 2016, Win Systems acquired Gold Club, a manufacturer of gaming machines and the Gold Club electronic roulettes with a presence in more than 50 countries around the world.

The combination of the two companies created a new leading group in the gaming industry with a significant presence in the Americas, Europe, and South Africa.
