

## Win Systems captivated G2E with its latest developments

Miami, October 27, 2022 - [Win Systems](#), the leading provider of technology for the gaming and entertainment industry, captivated the many visitors who came to its booth at the latest edition of G2E in Las Vegas.

Thanks to its commitment and constant innovation, **Win Systems** has always known how to catch the attention of visitors and this year was no exception. This was reflected in the constant flow of attendees who came to its booth, interested in learning about their latest developments. One of the most talked about was the **WINUP Wallet**, which caused a sensation among operators for offering all the functionalities of a wallet, while including access to various casino services. Also, the new generation of **InTouch** displays and the new system jackpot introducing the **Lucy & Pierre** characters were very successful.

In addition, **Win Systems** took the opportunity to present its new **Gold Club 25th Anniversary** roulette, which did not go unnoticed thanks to its exclusive design and renewed software design. Finally, the company also exhibited important novelties in its slot games library, with several new titles adapted to the needs of each market.

**Win Systems**, evidenced its resounding success with more than 200 meetings with current clients, as well as several operators from new markets interested in the technological solutions offered by the company. All of this was supported by the extensive team of more than 40 professionals who were present at the stand to personally assist visitors.

As a cherry on top of **Win Systems'** participation in G2E, the 4th edition of the most awaited event at the trade show was held: "**The Great Pack Party**", with the attendance of almost a thousand of the best operators from America and the rest of the world.

**Eric Benchimol, CEO of Win Systems**, commented: *"We are very pleased to have participated one more year in G2E, we are convinced that it is the perfect scenario to show our commitment as a global supplier to the industry. The constant work allows us to continue competing at the highest level and we saw it reflected in several new projects. It is an honor for us to see how so many customers are interested in our products and choose us as a global solution provider, both for casinos and for arcades, and route operations."*

#### About Win Systems

WIN SYSTEMS is a global provider of technology for the gaming and entertainment industry. The company specializes in casino and lottery systems and services, server-based gaming machines, and video lottery terminals (VLTs).

WIN offers a complete range of technological services, including the design, programming, installation, operation, and maintenance of its systems.

Our systems are recognized throughout the world for their stability and reliability, allowing a high level of real-time control of both lottery and casino operations.

In 2016, Win Systems acquired Gold Club, a manufacturer of gaming machines and the Gold Club electronic roulettes with a presence in more than 50 countries around the world.

The combination of the two companies created a new leading group in the gaming industry with a significant presence in the Americas, Europe, and South Africa.
