

Everi to Highlight Growing Interactive Gaming Capabilities at 2018 Global Gaming Expo

Platform Positions Company to Accelerate Delivery of Proven Land-Based Game Content to Online Social and Real-Money Markets

LAS VEGAS, Oct. 08, 2018 (GLOBE NEWSWIRE) -- Everi Holdings Inc. (NYSE: EVRI) (“Everi” or the “Company”), the casino gaming industry’s only single source provider of gaming products and financial technology solutions, is now delivering a comprehensive portfolio of interactive gaming products with the launch of its Remote Game Server (“RGS”) which it will unveil at the 18th annual Global Gaming Expo (G2E®) at the Sands Expo and Convention Center in Las Vegas from October 9-11. Alongside the Company’s most diverse lineup of Games and FinTech solutions, Everi will show casino operators how they can seamlessly create an online gaming entertainment community uniquely tailored to their brand and player strategies through the RGS.

The RGS is a platform to develop and distribute new games with a strategy that allows operators to launch land-based, online real-money, and online social gaming channels with higher visibility and promotion. Everi will leverage its existing land-based portfolio to offer more than 50 titles on its RGS in 2019 to support the Company’s interactive gaming strategy focused on exceeding expectations by replicating Everi’s premium land-based gaming experience for online players. The RGS was recently launched to support online social gaming opportunities and will soon be available to licensed online real-money gaming operators following approval by independent gaming testing agencies and regulators by the end of the year.

“Everi is favorably positioned to help our customers benefit through the development of customized gaming experiences that will engage their existing patrons, attract new players, and help them grow their businesses,” said Michael Rumbolz, President and Chief Executive Officer, of Everi. “Our customers know Everi as a creator of world-class content with slot gaming entertainment that continues to raise the bar on excitement and player engagement. Our new interactive gaming capabilities build on this legacy with content that will enable operators to deliver the most compelling online gaming, social, casual, and mobile content and to build player loyalty for their unique and valuable brands.”

“Everi has an expansive library of tier one content that we can now bring directly from our land-based game development process to our new RGS,” said David Lucchese, Executive Vice President, Digital and Interactive Business Leader, for Everi. “While we are still early in the rollout of our interactive solutions, our capabilities and success in this segment continue to improve at a significant clip with [Super Jackpot Slots™](#), already a top-rated, full-featured online social casino offering. We also have a tremendous library of high-performing stepper games that

we are now leveraging including the successful launch of the [High Rollin Vegas Slots™](#) online social casino. To date, our social and real-money interactive offerings are top performers and the launch of Everi's RGS will be another catalyst as we ramp our activities. Our library uses proven land-based math models and themes that players love to play in both the three-reel mechanical and video multi-line games. Players connect and engage with Everi's deep library of games and it's exciting to be able to unlock this for online operators."

At G2E, Everi's Interactive division's business discussions will include a focus on working with customers and partners to integrate with its RGS to bring proven, land-based tier one content to interactive and online channels. Discussions will also focus on establishing new relationships with brand and intellectual property owners to deliver these assets to both real-money wagering and social casino markets and seeking new affiliate partners and sponsorship/marketing opportunities for the Company's social casino opportunities.
