

Gary Platt Manufacturing Receives Patent for New Tesla Chair Model

RENO, Nev. (October 9, 2019) – Gary Platt Manufacturing has been issued U.S. Patent No. D861405 for its Tesla chair design. The patent is the latest honor for Gary Platt’s portfolio, and the third patent the company has received for its innovative designs.

Previously Gary Platt received U.S. Patent No. D829458 for its Monaco chair design. The chair has since gone on to become one of the best-selling casino chairs worldwide. Earlier this year, Gary Platt also received U.S. Patent #D847549 for its Epic Frame, which is known globally for its versatility and durability.

“We are thrilled to be issued the Tesla patent for our innovative and leading chair designs,” said Gary Platt Chief Commercial Officer Joshua Corrick. “Creating a chair is more than just design – it is artful mastery of design, engineering, ergonomics, and industry. We have the world’s finest artisans creating and handcrafting each and every chair we produce, and we are excited to have this team receive the recognition they deserve.”

The patented Tesla will be prominently featured in Gary Platt’s booth #2618 at the upcoming Global Gaming Expo. In addition to the Tesla at G2E, Gary Platt will show its cutting-edge seating solutions for the entire enterprise that will make operators sit down and cheer. The unsurpassed comfort that operators give their players in the casino is now available in collections for all areas of the casino, hotel, and hospitality venues.

For more information, join Gary Platt at G2E booth #2618, online at garyplatt.com, and on [Facebook](#), [LinkedIn](#), and [Twitter](#).
