

# Spinola Gaming releases Apex - a ground-breaking €250 million Jackpot Insurance product for Slot, Instant Game and Casino suppliers

Spinola Gaming is continuing on its mission to deliver the world's biggest jackpots to the masses, creating an exciting new Jackpot Insurance product designed to give casino game suppliers access to biggest jackpots currently available in the industry.

The upfront fees and minimum guarantee expenses normally associated with Jackpot Insurance has long been a big barrier to market for most operators. This makes it harder for operators, especially those still trying to establish themselves, to compete with those offering substantial jackpots and prizes.

Spinola Gaming has removed all these barriers and instead created a very simple process that allows huge jackpots to be added into already existing games and products, and also those still in development, without any minimum guarantees or upfront fees. Apex was created specifically for casino providers wanting to amplify their content with the biggest jackpots currently available in the igaming industry.

Ade Repcenko, Founder and CEO of Spinola Gaming, commented: "The existing gaming market is extremely saturated with games offering more or less the same level of prizes, and it has become increasingly harder for suppliers and operators to differentiate themselves from the competition. What we are offering is a way for them to up their game, and compete for players in a whole new way, by giving them the highest jackpots the industry has ever seen, without the risk. Apex can be integrated into any game, instantly increasing the potential prize win to any amount up to €250million. This provides a huge opportunity for operators who have been unable to offer such jackpots without adequate liquidity or uncertainty around game volumes."

"Apex is a huge development in the igaming industry, and is set to revolutionize casino jackpots as we know them. We welcome all those interested to get in touch or meet us at ICE or LAC to discuss further."

In addition to Apex, Spinola Gaming can also provide fully insured and certified RNG's attached to any jackpot plan which can be optimised for scratchcards, slot games, instant win games and much more.

Casinos are always looking for ways to offer their players the biggest jackpots in order to remain competitive and keep player retention high. These high-value jackpots can be especially useful when planning special promotions to gain top positions on partner casinos, or for those who simply wish to keep the player momentum going by enticing players with special offers around seasonal events.

The Spinola Gaming team will be at ICE and LAC this week to discuss Apex and give product demos of their ground-breaking Premium Instant Games. Get in touch to book a meeting: [sales@spinolagaming.com](mailto:sales@spinolagaming.com).
