TCSJOHNHUXLEY's Qorex Electronic Gaming Solutions Launch
Exciting Additions to the Range

TCSJOHNHUXLEY the leader in research, development, services and innovation in the live gaming space, showcased a range of striking additions to its Qorex Electronic Gaming Solutions line.

Qorex provides all the thrills of live gaming while delivering the benefits of electronic gaming such as multi-game selection and improved security whilst optimising resources and hardware to increase revenue. Designed to complement the attractive Qorex cabinet that incorporates system-controlled LED's, a range of new accessories featuring podiums, divider shelves and game signage displayed, shows just how flexible and eye-catching Qorex layout configurations can be achieved.

The circular overhead signage incorporates high intensity LED's that provide vibrant and eye-catching animated game information as well as attract modes, allowing players to clearly see the Qorex area and stages of the game, right across the gaming floor. New ergonomically designed player shelves double as spacers in-between terminals and feature the same LED lighting to provide a seamless look. Further player features include cordless charging spots for mobile devices along with drink holders to prevent spillages.

New podium designs that incorporate the same circular LED signage house automated products such as Saturn Auto Wheel and the innovative Giant Dice Shaker, which had its world-wide debut at ICE. All these products are designed to complement the Qorex pit and illustrate how flexible the system can be, as well as transforming the gaming floor and creating an exciting gaming experience for players.

Tristan Sjöberg, **TCSJOHNHUXLEY** Executive Chairman comments, "*The launch of these new additions to our Qorex range, elevate what is already a striking product, by complementing the main design features. Eye-catching LED lighting and ergonomic shapes enhance the user experience whilst providing a stunning centerpiece and attraction on the gaming floor.*"
