

Gaming Laboratories International (GLI®) to Showcase 30 Years of iGaming and Sports Wagering Experience at Inaugural ICE North America Tradeshow

Kevin Mullally, VP of Govt. Affairs and General Counsel, to Speak on “Regulatory Harmonization”

LAS VEGAS, NV (May 7, 2019) – Coinciding with its 30th anniversary, [Gaming Laboratories International \(GLI®\)](#) will spotlight three decades of customer service in global interactive gaming at the first-ever [ICE North America](#).

GLI Digital’s team of experts will be on hand at booth #J20 to provide attendees with valuable insights as to how GLI’s world-class iGaming, sports wagering, cybersecurity testing and certification, auditing, and professional consultancy services will help them create a game plan for success, both in the U.S. and globally.

In the conference area, GLI Vice President of Government Affairs and General Counsel Kevin Mullally will join Interim Chairperson of the Massachusetts Gaming Commission Gayle Cameron, for the session *“Minimum Standards and Regulatory Harmonization – Pipe Dream or an Achievable Reality?”* They will explore how best practices can be shared between regulators and legislators to avoid excessive regulatory fragmentation, along with finding common ground between regulatory and legislative forces to tackle responsible gaming, sports integrity, and enforcement issues.

Since the repeal of PASPA, GLI has responded to numerous inquiries from regulators, tribes, suppliers, and operators regarding jurisdictional requirements as they look to participate in regulated event wagering. GLI’s strong experience in online testing and sports betting, as well the company’s in-depth knowledge of each jurisdiction’s varying stipulations, has been heavily valued.

“We’ve been testing and certifying iGaming, sports, and events wagering for 30 years; however, until now, that testing was always outside the U.S.,” said GLI Vice President of iGaming & Canadian Services Salim L. Adatia. *“Now we are helping our clients in emerging markets within the U.S. and Latin America too, bringing decades of experience to work for them. By fostering strong collaborations with regulators, tribes, suppliers, and operators, GLI ensures our clients enter jurisdictions fully prepared. We help them at every step of the process – from first understating the requirements so there are no surprises or delays to market, and then helping them succeed in their testing and consultancy needs.”*

GLI Digital is everywhere iGaming is going and is approved in all regulated iGaming markets around the world. GLI Digital actively supports testing, consultation, and technical standards for all areas of gaming and sports wagering offered via the internet, mobile, wireless in-venue, and interactive TV. This includes the recently released *GLI-33 Event Wagering Systems*, the world’s first event-wagering technical

standard developed to help regulate and/or implement legal wagering on sports and other events. Download a free copy of GLI-33 here: <https://gaminglabs.com/gli-standards>.
